

All rights strictly reserved. Reproduction or issue to third parties in any form whatever is not permitted without written authority from the proprietor. Property of Rosenberger Hochfrequenztechnik.

fuer diese technische Unterlage behalten wir uns alle Rechte vor (DIN 34)

1) Alle Bohrungen durchkontaktieren mit Restringen auf Rueckseite. (Restringbreite min. 0.2mm)
 All drill holes plated inclusive pads on the backside. (padwidth min. 0.2mm)

VORSERIE

Die angegebenen Masse und Toleranzen sind nur Empfehlungen.
 The stated dimensions are only recommendations.

A wide variety of transmissionline topologies and pcb-parameters like permittivity, substrate thickness, and board-stackup are applied by customers. These parameters have a strong impact on the high frequency performance of the mounted connector. Please note, that the given layout is not optimised to fit all of the possible board configurations regarding RF-performance, it represents a recommendation for optimum solderability of the connector. In order to guarantee optimum high frequency properties of the connector, an RF-analysis of the connector to board transition is recommended.
